SUMMARY

Computer Science student and developer with hands-on experience in web scraping, lead generation, and workflow automation, currently building toward AI Engineering. Comfortable working across the stack — from Python-based data collection to automation platforms like n8n — with a focus on building systems that solve real, practical problems rather than isolated demos.

EXPERIENCE

Web Scraping & Lead Generation Specialist — ElevateX (Remote) ~1.5 Years

- Built and maintained web scraping systems to collect and structure business lead data for the company's outreach pipeline.
- Worked remotely as part of the lead generation process, handling data collection, cleaning, and organization.

Automation Trainer — Innovative Tech Summer Internship

- Gave training to students on YouTube automation during a summer internship in the first year of university.
- Taught practical automation workflows and tools to the students.

YouTube Automation — Self-Directed Ongoing

- Independently built and ran YouTube automation workflows, later expanding into a full AI-powered automation agent (see Projects).

PROJECTS

AI-Powered YouTube Automation Agent

- Built an end-to-end automation agent that generates a video's title, script, voice, and images, then handles the full pipeline through to publishing.
- Tech: Python, AI/LLM APIs, text-to-speech and image/video generation tools, YouTube Data API.

AuthoHR — Automated HR Attendance System

- 2nd-semester university project automating routine HR tasks, including attendance tracking and work-hour calculation.
- Tech: Python.

SKILLS

Programming & Web Scraping
Python, C++, C#, web scraping (requests, BeautifulSoup, Selenium)
Automation & Tools
n8n, Go High Level, Zapier, REST APIs, Git/GitHub

EDUCATION

BS Computer Science — University of Engineering and Technology, Lahore 2nd Year · Expected 2029

CERTIFICATIONS

AI Agents Training Certificate Completed

- Professional training focused on AI agents, automation, and practical AI workflows.
